

Application Name

Personal Phone Manager (PPM)

Description

Online phone management application that provides browser based access and management capabilities to individual phone settings

Features & Benefits

Online browser application offering unique login for each number / user, remote working and enhanced business mobility

Personal Phone Manager

The Personal Phone Manager (PPM) from Flip Connect is a web-browser application that allows you to manage and control calls easily via your PC at a click of a button.

PPM Call Control Functionality

The PPM Call Control window provides information about the line on your phone and calls in progress as well as providing a dial keypad, call control buttons and speed dial lists.

Plus, from each desktop the following call control functions are also available:

- Making a call
- Transferring a call
- Hanging up a call
- Putting a call on Hold
- Parking a call
- Picking up a parked call
- Picking up a Multi-line parked call
- Using Do Not Disturb
- Using Speed Dials
