

### Service Name

Business Mobile Packages

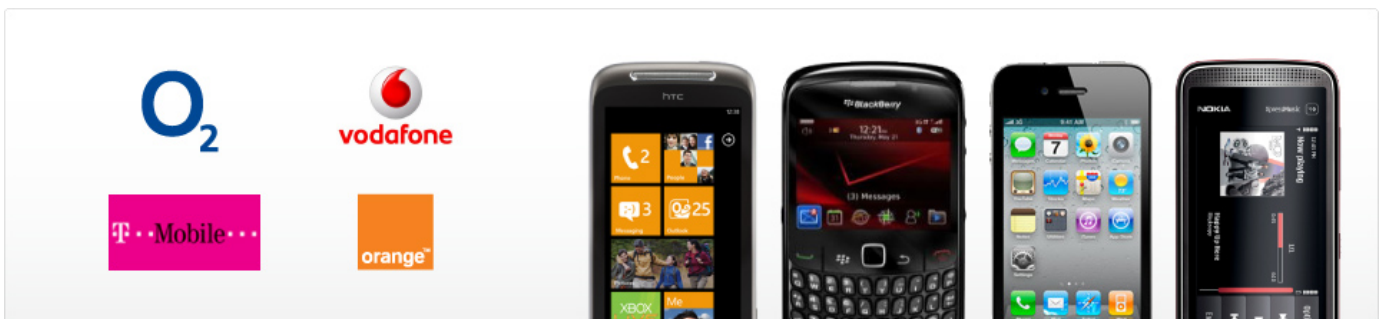

### Description

We have strong relationships with each mobile network and can provide the best handsets at the lowest prices. Our business tariffs ensure you get the highest levels of service at the best possible price.

Flip can explain the options, help you choose, and save you money on your business mobiles at the same time no matter how small or large your usage or how many business mobile phones you have.

### Features & Benefits

Every supplier has a range of business mobile plans, all of them different. It's our job to understand what's on offer and, through a detailed analysis of your current and expected usage, help you choose the network, tariff and handset that's right for you and each of your employees. We partner with all the main mobile networks – Vodafone, T-Mobile, O2 and Orange – so we are completely independent. Our aim is simply to find you the best deal today and in the future.

### Testimonial

“ With a great choice of options, we were guided to the correct solution for all of my staff.

Jim Berry . Managing Director . Morrish & Partners Ltd
